

Over 15 million Filipinos still have no access to electricity, according to a recent study by the World Bank and the Australian Agency for International Development. Students are still relying on kerosene lanterns or candles to study at night. Families spend as much as 30% of their income on kerosene which are unsafe, uneconomical, and pose serious threats to health especially to women and children due to indoor air pollution.

With your donation to **“GIVE LIGHT, IMPROVE LIFE”** campaign, solar lights will be provided to our students and to homes of indigenous families living in remote areas that do not have electricity for more effective and environmentally friendly lighting system. A recent report from the World Bank also showed positive effects of solar lighting on education and learning in many inhabitant villages around the world.

GIVE LIGHT, IMPROVE LIFE

Make a difference by giving them clean and safe solar lighting for their homes starting this holiday season.

US\$15 - will light up 1 home

US \$30 – will light up 2 homes

US \$60 – will light up 4 homes

US \$150 – will light up 10 homes

Or Donate any amount

To donate now, visit www.oneheartforhope.org

Your generous contribution will provide life-changing solar lighting to the homes and students in extreme need. Thank you.

In collaboration with **d.light design**, an international consumer products company based in the USA and **AsiaConnect, Inc.**, a full service sales and marketing solutions company creating bridges for great ideas.
